street lighting and highways

Street lighting and highways projects are a significant and growing part of our practice.

We have advised on a number of street lighting and highways projects, always with the aim of delivering innovative solutions that reflect the requirements of our clients.

We have advised both the public and private sectors on a range of PFI and maintenance/outsourcing contracts and so understand the common issues and concerns for both parties in this sector. Our skills have been recognised in Public Private Finance Magazine which noted our expertise in Street Lighting and Highways projects. We also have substantial experience of structuring procurements and of applying competitive dialogue to complex projects.

One of our real strengths is in advising local government (where we have, for a number of years, been nationally listed as one of the top tier firms advising in this sector) on its highways and transportation outsourcing contracts. Devising legal solutions to meet local government is something we find genuinely exciting and an area where our accumulated experience enables us to offer real value for money.
